MORTUARY

Mrs. Mary L. Dickson.

Mrs. Mary L. Dickson, who died at her home in Union township, Monday, May 4, was the widow of Elias Dickson, one of the first settlers of Union township, and was a cousin of Dickson Thompson, A. C. Thompson and Daniel McDonald.

She was the last of the older pioneers, the Voreles, Morrises, Thompsons, McDonalds, Dicksons, Brownles, Houghtons, Bakersleys and others who settled in Union township, in 1836. She was almost 90 years old at the time of her death. Many of the children of these first families, who came with their parents to Union township still survive and are among the best and most prominent people of the county; but they are the old settlers now, the frosts of 67 years in Marshall county are on their brows and of their parents who were the hardy pioneers 67 years ago none are now living.

In 1836 when most of these settlers came from Fayette county, Indiana, headed by Thomas McDonald, the father of Daniel and Platt McDonald and the founder of the Plymouth Democrat, the Indians out-numbered the white people two to one, but they

were peaceable and no disturbance of any kind ever occurred between them and their white neighbors.

Charley Cook, who came here in 1834 and made his home with the Indians, often said to the writer of this that "they were the only perfectly honest people ever in Indiana, on whose promises perfect reliance could be placed."

But the ladies of Marshall county, even now can imagine how these pioneer women and children trembled sometimes when they were first left alone by their husbands in the rude log cabins surrounded by hundreds of Indians.

There were no roads in those days. The nearest mill for the settlers of Union township was at Logansport and the man who did the milling for the neighborhood, blazed his way as he went, it took him two weeks to make the trip and he was applauded when he came back.

The country was then full of swamps and more than half the population was prostrated by malaria during the spring and fall months; proper medicines and good physicians were hard to obtain and it is wonderful that so many of these first settlers lived to an old age.

The last of the older generation has now passed away. At this writing we have no data of her early life. She was born in Kentucky and came from that state to Indiana, she endured the hardships incident to the early settlement of the country, lived a long and useful life, was universally esteemed

Tree Over 1300 Years Old.

The age of a tree is determined by the number of rings of wood its trunk contains. The woody fiber is slower in growing in winter than in summer, and consequently distinct rings are formed, each representing a year. By means of these rings the gigantic cross-section of a California tree, 1,341 years old, is used at the New York Museum of Natural History as a history chart, and as such it shows in a novel way the sequence of events in the last thousand years.
